

Dear Sirs, I am angry that another attempt by a powerful political organization is attempting to once again control what I as a consumer can receive. I enjoy the satellite radio enough to pay the subscriber costs (same as I do for cable TV). There is no reason why the NAB should be trying to limit what I can receive for that service. If they are concerned with loss of market then they should be looking to provide similar services (Isn't that supposed to be the American way?), rather than trying to stifle the competition through back door politics. I urge you to reject NAB's petition 04-160 and any subsequent attempts to limit what I can receive as a subscriber to satellite radio service.
